

# CATSA's Summer Packing Tips

**Bottled water and other beverages** are not permitted through the pre-board screening checkpoint. Drinks are available in the secure area, past the checkpoint.

**Sunscreen and insect repellent** should be packed in your checked baggage. There is a limit of one container of insect repellent per passenger.

**Flammable camping items** such as gas containers for grills and strike-anywhere wooden matches are **not allowed** in carry-on or checked baggage.

**Pocket knives, scissors, fishing hooks** and other sharp objects must be packed in checked baggage.

**Toys guns and weapons ammunition** are not permitted in carry-on baggage. Leave them at home to avoid hassles.

**Sports equipment** such as **golf clubs** and **baseball bats** should be packed in your checked baggage.

**Cameras and film** can be packed in your carry-on baggage. The x-ray equipment is safe for film under 800 ISO/ASA.
